

This Board needs 8...18 V from CPU Board

+V2 is external power to CPU board (8...12 VDC)
+V1 is external power from CPU board
+3V3 is regulated 3,3 V from CPU board

Wire links for oscilloscope GND

ROTARY ENCODER AND BUTTONS

(Rotary Encoder do not have push button)

I2C BUS PULL-UP RESISTORS

IO EXPANDER

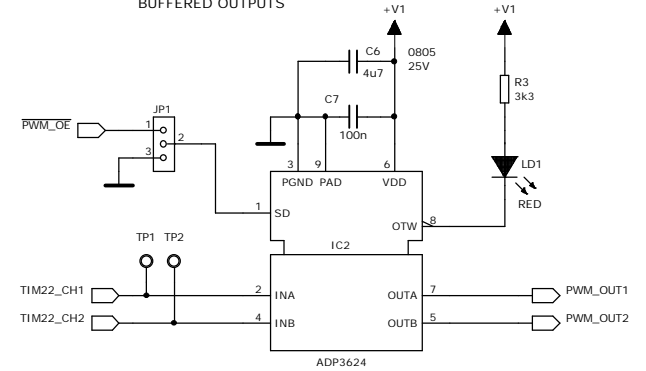

POTENTIOMETERS

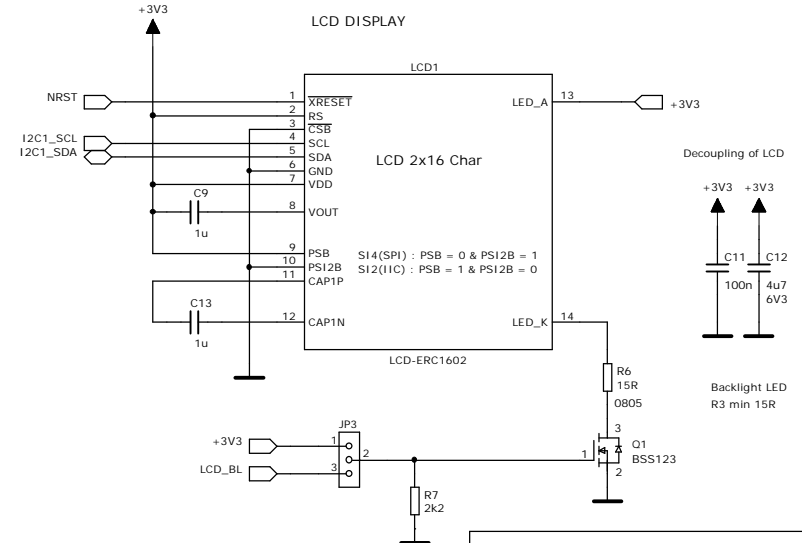

NOTES:

Resistor packages size is 0603 unless otherwise indicated.
Capacitor packages size is 0603 unless otherwise indicated.
All capacitors dielectrics are X7R or X5R.
All capacitors votage values are minimum voltages.

BUFFERED OUTPUTS

TEST POINTS

POWER SUPPLIES FOR APPLICATION

BUFFERED OUTPUTS FOR APPLICATION

This can be normal outputs or PWM outputs.
Voltage levels depends +V1 (+3V3...+18V)

Voltage divider resistors R8...R11 are THT 1/8 W

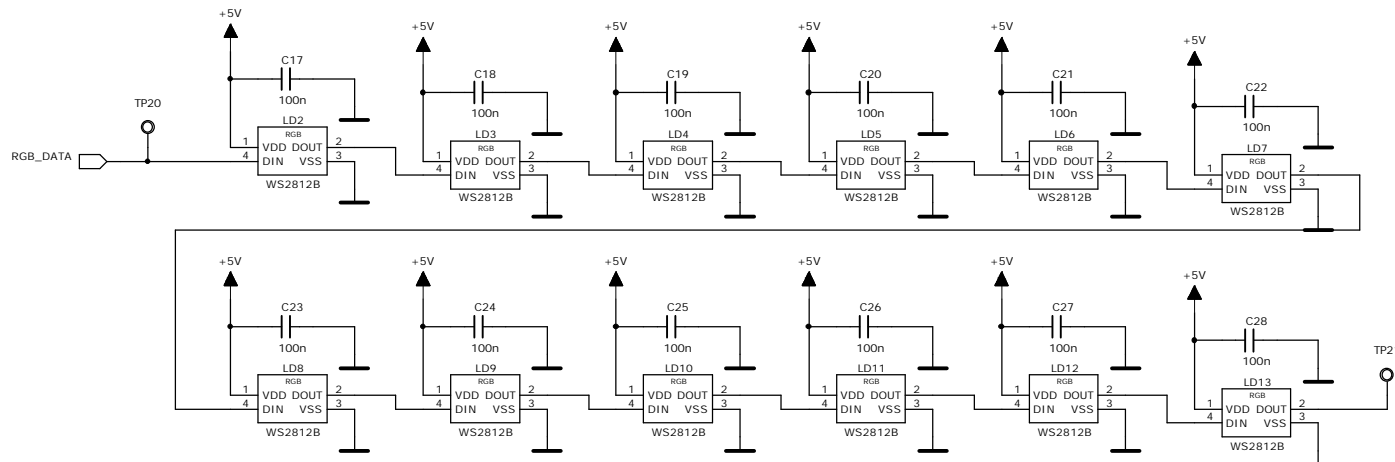

The values of the resistors depend on the voltage to be measured.

If the voltage is 3.3V or lower, the series resistors can be replaced with a jumper link.

PIN HEADER CONNECTORS FOR APPLICATION
